IRON COUNTY RECORD.

Vol. 14.

Cedar City, Iron County, Utah, Friday, Mar. 22, 1907.

No. 16

NEWS OF SOUTHERN UTAH TOWNS

By Our Correspondents.

Parowan, Utah.

Parowan, Mar. 20th 1907.

Mr. and Mrs. Edgar Clark entertain this afternoon in honor of Doctor and Mrs. McGregor, who are here for a day or two.

Mrs. Sarah A. Adams, who has been touring for the past three months, returned in time for the stake conference.

Mrs. E. Crane Watson has moved to Cedar for an indefinite period, according to the tide of circumstances by which she may be surrounded.

Willie and Manice Matheson were more than pleased last night that a handsome boy should make application at the family domicile for invitation to be "one of them." The glad hand was warmly extended by the entire household.

Today is Aunt Paulina Lyman's eightieth birthday. A nice program in her honor was to have been rendered at the opera hall today, but on account of the death of Aunt Clarissa Whitney the celebration is postponed.

Clarissa Whitney Dead.

At four o'clock this morning dear Aunt Clarissa Whitney passed from this mortal stage of existence, after a few hours illness. It has been noticeable for some time that Sister Whitney has been failing physically though she has not complained and has been up and around to the last day.

Sister Whitney is the last of the lady pioneers to Parowan, and mother of New S. Whitney, the first male child born in this place, a record of which the lady talked with pride, as well as that of her husband being a member of the Mormon Battalion, which was the means of Sister Whitney drawing a pension to the day of her death.

Sister Whitney was an unassuming, inoffensive woman, wishing never to injure another, but to do all the good in her power. She is the mother of five children, her little girl dying in babyhood. Her four boys survive her with a host of grandchildren and great-grandchildren.

Sister Whitney would be seventy-two years old in June and was familiar through experience with the drivings and sufferings incident to the early history of the Latter-day Saints.

Summit, Utah.

Summit, Utah, March 20, 1907.

"The twilight is sad and cloudy
The wind blows wild and free."
—Longfellow.

Quite number of our people attended conference at Parowan last Sunday.

We believe our sick are all improving with the exception of Mrs. White, who grows weaker and whose condition is pitiable.

Several of the smaller children are suffering with a bronchial cold. The babe of Bishop Hulet, and the children of Thomas Lawrence are having it very severely.

While Clarence Smith was coupling his wagons at Pioche last week, the team backed and caught his hand, breaking one finger and mashing another very badly. When he reached Cedar there was grave danger of blood poisoning, but Dr. Green soon made him comfortable, and he is progressing nicely.

Heber Dalley had quite an exciting runaway last week. The team ran most viciously and being on the running gear, he had no power to steady

himself when they struck a large rock, which threw him off. The running gear parted and going over him breaking his collar bone. He was in great pain until Dr. Robison arrived and set the bone. The only thing which seems to trouble him now is his enforced idleness.

The amusement committee promise us an entertainment on the 30th inst. The proceeds to provide lamps and oil for our meeting house. The object is praiseworthy one, as nothing is more depressing or objectionable than a dimly lighted hall and we trust the efforts of the committee and workers will be appreciated, as we are sure from the program (which is varied and amusing) something much better will be given than we get from these trashy shows which are flooding the country.

We were extremely gratified when we knew Apostle Geo. F. Richards and Pres. Chas. H. Hart were to be with us on Friday. We had a full house and the speakers were listened to with interest. While here they re-organized the bishopric, which now consists of Charles R. Dalley, bishop Oscar W. Hulet and Joseph E. Jones, counselors, and Arthur P. Jones, ward clerk.

Virgin, Utah.

Virgin, Utah, March 12.

We are having March weather—cold winds and sleet.

Born to Mr. and Mrs. John Haslam, a son on the 9th inst. All concerned doing well.

Oil men are still here in the interest of the oil fields. Messrs. Macgregor and Loveless, two of Mr. Montgomery's men, are here awaiting his arrival and pleasure. As the roads are so bad they do not know when that will be.

The small machine that was here two weeks ago struck oil and went back to Acoma on the 22nd of Feb., well pleased with the strike. Mr. Scott said he found better than he expected.

We are very sorry that St. George has succeeded in getting the mail route changed, as it will make our mail a day or two later—if we get it at all—and does not make any difference to them, except to satisfy their selfish desires.

The Man From Mexico.

When Walter Perkins, a well known comedian, asked H. A. Du Souchet, an unknown writer, to incorporate his wit into a play, he responded within a very short time with "My Friend From India," which made him wealthy. A few months later he followed this great farcical comedy, with "The Man From Mexico," which made him famous.

This comedy is a marvel of ease and fluency and has a brilliant style. It carries a sustained interest, depending not alone on the incidents, but also a true development of all the characters.

Never has any author better understood manifold dramatic appropriation than Du Souchet, and in no comedy has this most necessary element been given a greater unity of action. The big act of the play is the second, during the action of which, the title role in the comedy, while serving thirty days in Blackwell's Island just across the river from New York City, when he is supposed to be in Mexico, causes, by his monopolization of the act, the most amusing and ever changing situations; a greater complication of plot and a maximum wit and humor of the most vivacious and relished kind than exists in any other comedy ever produced. Will be seen here in April.

GREAT IS SOUTHERN UTAH.

Enormous Dormant Mineral Resources of Iron County.

CEDAR CITY COMMERCIAL CLUB (Mining Committee.) (Continued from last week.)

There are several other most valuable mining properties in the various districts of Iron County adjacent to the iron and coal mines, one of which is the Bullion Canyon Mining Company's claims; and some idea of its value can be obtained from the reports of the assays taken from samples. The veins are large and opened up in dolomite limestone and quartzite with dykes of porphyry coursing the country. The characteristics of the ores are carbonates of lead and copper, galena, chloride of silver, bromide and sulphides.

A like condition exists also in Chloride Canyon just east of the Bullion canyon a mile or two, parallel with it, and in which there is a similarity in formation with characteristic ores in the veins. Both of these Mining Districts are in Township 37 South, Range 14 West and are most accessible as well as feasible for a railroad branch to present developments.

The Homestake Mine situated on Iron Mountain in the Plato Mining District contains the same characteristic ores, with like conditions in formation, excepting unusual bodies of iron ores which are also developed; the deposits or veins in these claims, are from twenty-five to fifty feet in width at a depth of from one hundred to two hundred feet, and show considerable copper through the veins. We are unable at present to get certificates of assays on this property, but the values are good.

The following table is a compilation of the certificates of assays made by various assayers within the last two years of prospecting and developments made by the Bullion Canyon Mining Company, composed largely of Cedar City business men. It is under the able management of J. R. Richards of Cedar City. There is a fair conservative estimate that the great quantities of low grade ores already in sight could be shipped and made to pay if a branch railroad connection was operated.

| ASSAYS FROM BULLION CANYON. | | | | |
|-----------------------------|--------|--------|--------|---------------|
| Cert. | Lead | Copper | Silver | Gold |
| per c. | per c. | per c. | oz. | Value per ton |
| No. 1 | 34 | none | 8 | \$4.00 |
| " 2 | 36 | 36 | 7 1/2 | 4.80 |
| " 3 | 64 | none | 6 1/2 | 5.28 |
| " 4 | 79 | none | 11 | 4.50 |
| " 5 | 13 | none | 79 | 4.80 |
| " 6 | none | none | 184 | none |
| " 7 | 57 | none | 9 | 3.80 |
| " 8 | 25 | 6 | 7 | 2.50 |
| " 9 | 47 | none | 6.88 | 1.80 |
| " 10 | 37 | none | 11 | 5.82 |
| " 11 | 38 | none | 7.5 | 3.40 |
| " 12 | none | 38 | 6.5 | 1.60 |

Assays of the above are selected samples taken from the winze incline in the main tunnel and the three shafts and also from the surface croppings. Other assays of much less value are not given, however unusual quantity of the various ores exist indicating with depth a great shipper.

| ASSAYS FROM CHLORIDE CANYON | | | | |
|-----------------------------|--------|--------|---------|---------------|
| Mine | Lead | Copper | Silver | Gold |
| per c. | per c. | per c. | oz. | Value per ton |
| No. 1 Banner | none | 112 | \$14.00 | \$90.28 |
| No. 2 Banner | none | 32 | 7.00 | 113.03 |
| No. 3 Eagle | 65 | none | 8 | 6.50 |
| No. 4 Gov Wells | 14 | 3 | 4.29 | 78.30 |
| No. 5 Gov Wells | 18 | 51 | 2.20 | 125.00 |

The above are also selected samples taken from the various surface croppings and openings. The formation here is similar to the Bullion Canyon with also every indication of unusual quantity of low grade ore and indications of high grade ores with greater depth.

Without exaggeration it seems more than probable that greater values exist in many localities of the various mining districts of Iron County beneath the iron ore masses. Recent developments in Iron County have demonstrated the fact, and the following mining districts contain ores of gold, silver, copper and occasionally lead.

The State Line and Short Line Districts near the west boundary line of the county, 75 and 47 miles respectively from Cedar City, are attracting great attention recently in the phenomenal developments of the "Big Fourteen" mine in the former district. Particularly is it noticeable that results from assays ran 5.038 oz. in silver combined with 28.40

ounces in gold per ton or at the rate of \$3,609.28 per ton of 2000 lbs in one instance and that in another instance a sale of 3600 pounds of ore gave returns of \$595 cash for the gold and silver in it, the same being at the rate of \$330 per ton or 16 1/2 cents per pound. The Short Line or Younger group of 16 claims north of State Line and 14 miles northwest of Lund station and 20 miles south of Newhouse is a late discovery. This property a mass of 8 feet of iron ore capping containing 57 per cent metallic iron ore values of 1 per cent copper, five ounces of silver and trace of gold. The Gold Spring District located about 60 miles west of Cedar City near the west boundary line of Iron County, has among its property the "Jennie" mine. Recently under the able management of Mr. Charles Short it is developing a shipper. Twenty six tons of ore sold gave returns of \$1560 or \$60 per ton.

The Iron Springs, Pinto, Desert Mound, and Iron Mountain Mining Districts west and northwest of Cedar City all the way from 12 to 25 miles distance embracing the greatest area of the iron fields of Iron County have the massive solid outcroppings of iron. These with the numerous openings, shafts, pits and exposures throughout practically demonstrate the enormous quantity and extraordinary quality of iron ore in sight. Many of the following groups and claims contain gold, silver, copper and lead. The Walker-Jones group of 15 claims about 280 acres have outcrops and development 80 to 90 feet of iron. Out of 60 samples taken by Bradburn assay values ran 59 per cent to 72 per cent metallic iron with little to nothing in phosphorus, titanic acid or sulphur. It is a Bessemer iron. Each of the Colorado Fuel Co., and Milner groups are similar in character of ores with much larger areas and holdings. Other groups are also similar and known as the Cullen Ryan; The Thompson Arthur, The Kennedy Duluth, The Younger, The Sawyer-Walker, The Mat Wicks The McGarry Group and others, all of which are large holdings and many of them are patented claims with incalculable tonnage in sight. In Washington County Dixie Mining District the famous Apex copper mine is operated with a smelter successfully. The Paymaster adjoins the Apex and also produces fine copper ores.

In Little Creek Mining District the Culver-Thornton Big Buck Mining group 12 miles from Parowan have fine iron ore assaying 55 per cent to 78 per cent, another 68 per cent Metallic iron with \$2 00 in gold. The Clark Hendrickson group adjoins and practically has the same ore with Manganese and tungsten.

In the Indian Peak Mining District the Silver King group containing ores having assays gave 52 per cent lead with \$6.00 gold. Another gave 44 oz. silver and 58 per cent zinc. Locality 15 miles from Lund station.

Words alone are not necessary coming from the Mining Committee of Cedar City Commercial Club to support the statements herein, but disinterested expert, practical examination on and in the fields and grounds will do more. We call attention. We are not a prolix, but a proviso. Not infallible. It isn't the province of the Mining Committee to foreshadow or prophesy in a lengthy speech, but to call attention in a disinterested manner to the various mineral resources of the several mining districts in southern Utah. That capital will join and co-operate with the miners and owners and develop this neglected region, which has not had a fair square deal goes without saying. We also call attention to this fact. Throughout the iron districts upon a number of claims that more than indicate copper, silver and gold are being developed. It frequently occurs to the miner that the great deposits of iron cap these ores of metals, and that bodies of the precious metals copper and lead ores may be found beneath the iron in similarity to the "Deposit Phenomena" of Leadville, Colo., and elsewhere.

Stringers, feeders, veinlets and bunch deposits of these ores are already in limited quantity carrying good values, exposed in the masses of iron ores and sometimes in the dolomite limestones, usually in carbonate

chloride oxidized form.

In an isolated mining region far removed from an ore market, with no railroad or rates for the transportation of the products of low grade mines has in the past given little encouragement for outside capital to invest and develop the metal lodes and deposits of Iron County. So it has been with both iron and coal property. Notwithstanding, too, unusual assay values of copper, lead, silver and gold are constantly found in the great mass of valuable low grade ores in enormous veins and deposits in various mining districts of both Iron and Washington Counties of southern Utah.

For forty or more years the old timers have known of the facts above stated. Yet the statements they have made are verified, without verbiage, investigation, exploitation and demonstrations have substantiated the truth that both quantity and quality ores exist in the various mining districts of Southern Utah that cannot be gainsaid.

"Pneumonia's Deadly Work" had so seriously affected my right lung," writes Mrs. Fannie Connor, of Rural Route 1, Georgetown, Tenn., "that I coughed continuously night and day and the neighbors' prediction—consumption—seemed inevitable, until my husband brought home a bottle of Dr. King's New Discovery which in my case proved to be the only REAL cough cure and restorer of weak, sore lungs." When all other remedies utterly fail, you may still win in the battle against lung and throat troubles with New Discovery, the REAL cure. Guaranteed. 50c and \$1.00. Trial bottle free. For sale by Palace Drug Co.

Old California Trail.

The indignation felt over the continuance of the mail service between Kanarraville and Leeds by those dependent upon the route, is well expressed in the following terse note from Mr. B. F. Anderson of the Anderson Ranch, addressed to T. A. Thorley, postmaster of Cedar City. Here is what he says:

Kanarraville, Mar. 18, 1907.
Mr. T. A. Thorley, Cedar City, Utah.
Friend Thorley.—We are very indignant about the mail service.

I am writing Mr. Ryan for a petition. He will hand it to you. Please do all you can in an official way to get the mail service re-established. It is very inconvenient for all Washington county to have their mail go by way of the old California Trail.

Trusting that you will co-operate with Mr. Ryan in setting forth the necessity of a re-establishment of the service, I remain,
Your friend,
B. F. ANDERSON.

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature to do its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Take Hall's Family Pills for constipation.

The congestion in traffic business on the San Pedro road caught a shipment of our newspaper in the tie-up, and on press day we found ourselves with only enough paper to print our city edition. It was Sunday before our shipment reached us, so that our out of town subscribers were two or three days late in receiving their papers. We will try to keep a larger supply of paper on hand in the future, so that a few weeks' delay will not effect us.
